Introduction to RCM2 — Remaining course dates for 2010

The worst consequences of the irresponsible custodianship of physical assets are that people may die. Sometimes in large numbers. The importance of successful and responsible maintenance cannot be underestimated and its impact on the safety of your workforce should never be under valued.

We can show you how to:

- ◆ Recognise unfocused maintenance
- ◆ Improve equipment operating performance
- ◆ Reduce your backlog of routine maintenance

RCM2, Reliability Centred Maintenance is a technique that will bring you greater safety and environmental integrity, improved operating performance, greater cost

effectiveness and longer useful life of your equipment.

By sending any number of members of your team to our 3 day Introduction to RCM2 training courses, you will be able to:

- ◆ Contain the cost of maintenance in a time when costs are increasing.
- ◆ Reduce the need for reactive maintenance.
- ◆ Cut the number of multiple failures that have serious consequences.
- ◆ Create a comprehensive database and audit trail.
- ◆ Establish which components and functions of a system are critical.
- ◆ Gain a clear view of your resource requirements.
- ◆ Dramatically improve your ability to manage

asset performance.

Our 3 day intensive courses are held in Loughborough within the world renowned University campus, in Leicestershire, England. Loughborough is easily accessible from the M1 (Junction 23) and is only 8 miles from East Midlands Airport, it is also only 90 minutes from London St. Pancras by train. A few remaining places are available on the following dates:

Tuesday 7th—Thursday 9th September 2010

And

Tuesday 9th—Thursday 11th November 2010.

New Business Development Manager for Global Reliability Training

Global Reliability Training are delighted to announce the appointment of Sarah Chalmers as their new Business Development Manager.

Sarah has previously worked in the public sector, gaining experience in education and the National Health Service as well as running

her own business. She graduated from the University of Stirling in 2001 after studying a degree in Midwifery.

Sarah says “ I am delighted to be working with Global Reliability Training as their Business Development Manager and I am very

excited to be driving the company forward. This is an extremely important time for businesses, due to the economic climate”.

If you would like to discuss any training requirements with Sarah, please contact her on (0044) (0) 7773 670163 or click [here](#) to email.
